

The difference is clear

Alternatives to traditional style Georgian wired fire safety glass

The glass industry is currently facing a global shortage of Georgian wired glass with current UK stock levels rapidly depleting.

As the leading independent provider of fire safety glass, we're working closely with our national network of stockists and processors to see what other options exist to fill the gap.

Is it time to clear your thinking?

Through market leading fire safety glass products and developing solutions in passive fire protection, Pyroguard have been helping to provide safer places for people to work and live for over 30 years.

All our products are tested and certified in the widest range of systems and applications and we have the technical know-how and expertise to help you find the right product for your chosen application.

Whether you're looking for the right glass to go into a 30-minute fire door, or refurbishing a school or hospital that currently has wired glass in need of replacement, we can guide you through all your options so that you can make the switch with ease.

In summary we can provide you with;

- ▶ A selection of cuttable and monolithic toughened alternative options to traditional wired fire safety glass in a complete range of thicknesses
- ▶ Non-wired products that are suitable for both internal and external applications in a selection of steel, timber and aluminium framing systems
- ▶ Alternatives with superior levels of safety through our products achieving higher impact classifications
- ▶ Modern alternatives to Georgian wired glazing that provide greater aesthetics, much improved visual qualities and light transmission performance
- ▶ All of these products fast, Nationwide!

Clearly a safer alternative for schools and colleges, hospitals, commercial premises or refurbishment projects.

Greater aesthetics for a modern finish

Safety upgrades for schools & colleges
