

TECHNICAL BULLETIN

We're excited to share that Pyroguard Protect and Pyroguard Rapide Plus EI30 have successfully passed EN 356 P1A testing, reinforcing our commitment to delivering high-performance fire safety glass with built-in attack resistance.

Conducted at TÜV Rheinland Nederland B.V., we subjected several EI30 compositions to rigorous impact testing in order to evaluate the performance.

Fire rating: EI30

Glass type: Pyroguard EI30 INT, Pyroguard T-EI30/18-2, Pyroguard T-EI30/18-2 VF

With this latest certification, our EI30 fire-rated glass not only ensures compliance with stringent fire safety standards but also provides proven impact and attack resistance. This means you can now choose from a wider range of fully certified solutions that combine fire protection with enhanced security. Alongside our existing Attackguard product, these newly tested glass types give you even more flexibility and provide cost-effective solutions without having to compromise on performance or aesthetic design.
