Reaching new heights with Pyroguard Protect and Schüco façades

SCHÜCO

We're delighted to share the latest results from our ongoing collaboration with Schüco; bringing you even more fire safe solutions for aluminium façades.

Featuring the Schüco FW50+ FR60 curtain wall system, we can now provide you with an extended range of certified aluminium solutions that meet an EI60 fire rating in accordance with EN 1364-3.

Tested and approved at Efectis, in The Netherlands, the range covers the following scope:

Construction type: Façade / Curtain wall system

Fire rating: EI60

Glass type: Pyroguard T-EI60/25-3 (largest tested pane size: 1500 x 3000 mm)

Frame: Schüco's FW50+ FR60 curtain wall systems

After comfortably meeting the test requirements we now have the opportunity to provide greater flexibility for aluminium façades.

For further information or to discuss how we can help you with your next project, please contact us.
